REMEDIATION MODULE 2

Innovative, practical and cost effective remedial solutions to soil and groundwater contamination issues.

RAW always select the most appropriate remediation solution to a contamination problem, without over-engineering or under-estimating the task in hand.

Who do RAW help?

- Property owners
- Developers
- Insurance industry
- Utility companies
- Civil engineering contractors
- Consultants
- Construction companies
- Demolition companies

RAW works as either a Main Contractor or a specialist subcontractor as needed for the project, under standard civil engineering contracts or fixed price agreements.

Specialist Remediation Services

Why use RAW?

- Pragmatic, cost effective approach to remediation design and implementation
- Develop innovative remediation technologies to save time and money
- Mobile Treatment Licence for in-situ and ex-situ soil and groundwater remediation
- In-house modular treatment systems for wide range of in-situ applications
- Strong R&D approach allowing effective development of specific remedial solutions

What services do RAW provide?

- Dual and multi-phase extraction
- In-situ & ex-situ chemical oxidation
- In-situ air sparging
- Physical separation and oil recovery
- In-situ enhanced biodegradation (aerobic or anaerobic)
- Pump & treat (filtration, air stripping and chemical treatment)
- Vacuum extraction (low or high vacuum) applied in-situ or ex-situ
