

RAW

RAW has wide experience of remediation of filling station sites and the pragmatism and technical know-how to formulate innovative yet practical and cost effective remedial solutions.

RAW always selects the most appropriate remediation solution to a contamination problem, without over-engineering or under-estimating the task in hand.

Who do RAW help?

- Petroleum Retailers
- Forecourt Service Providers
- Fuel Storage Facilities
- Utility Companies
- Insurance Industry
- Civil and Demolition Contractors
- Environmental Consultants
